

# WhisperGreen Select Wiring Configurations

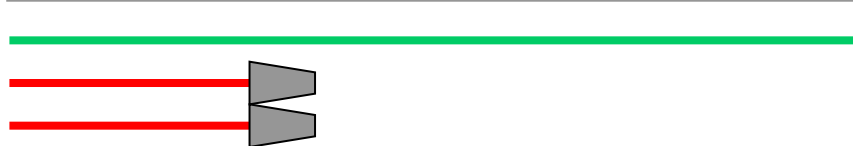

## 1) Manual Control Wiring Diagram (ON/OFF or Boost from Low Speed to High Speed)

- *Connect red Signal Wires directly to Wall Switch*
- *All modules are functional when installed*
- *DO NOT connect Signal Wires to Power*

## 2) Automatic Control Wiring Diagram (Wire direct to power supply)

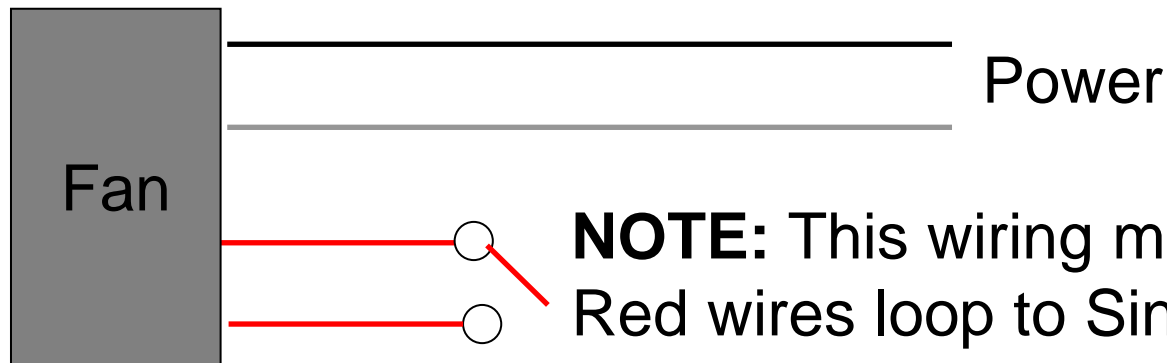

- *Signal Wires must be capped separately*
- *Must have Motion or Condensation module for Fan to Operate in High Speed*
- *DO NOT connect Signal Wires to Power*

## 3) Basic Wiring Diagram (ON/OFF for Single Speed)

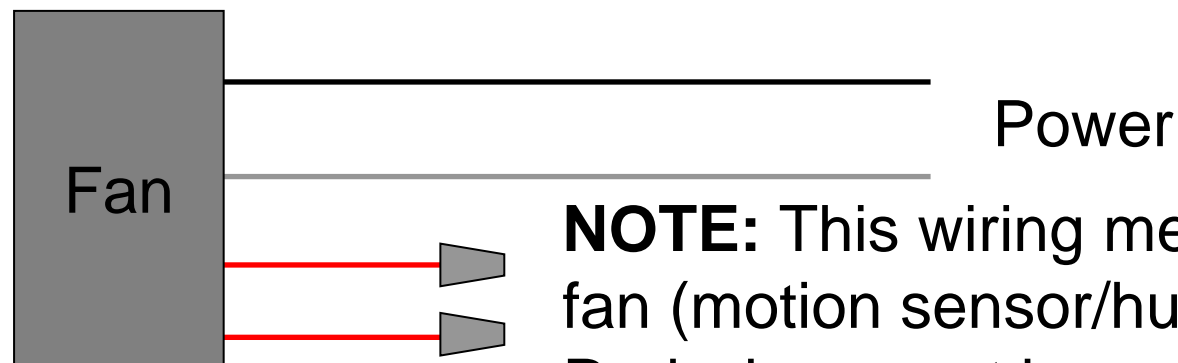

- *Signal Wires must be capped separately*
- *No Modules will function when fan is switched off*

### WIRING METHOD 1 – For MANUAL CONTROL & All Plug & Play modules

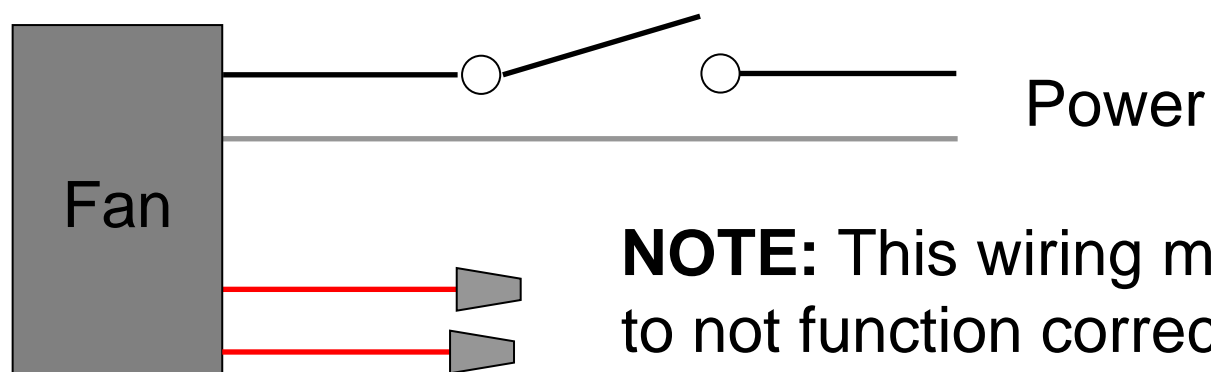

**NOTE:** This wiring method for MANUAL CONTROL of the fan.  
Red wires loop to Single Pole switch.

### WIRING METHOD 2 – For AUTOMATIC CONTROL only (All Plug & Play Modules)

**NOTE:** This wiring method is for AUTOMATIC CONTROL of the fan (motion sensor/humidity control ONLY). No manual control.  
Red wires must be capped separately.

### WIRING METHOD 3 – For On/Off Operation Only (No plug in modules)

**NOTE:** This wiring method may cause Plug & Play modules to not function correctly. Red wires must be capped separately
